

Syed Salman Reza

Software Engineer

Dhaka, Bangladesh | +880-1970279556 | syed.reza181@gmail.com | linkedin.com/in/salman-reza | github.com/syed-reza98

PROFESSIONAL SUMMARY

Results-driven Software Engineer with proven expertise in backend and full-stack development. Skilled in PHP (Laravel), Python (Flask), and React (Next.js), with hands-on experience in designing scalable microservices, API development, and multi-tenant database optimization. Experienced in multi-vendor ATM/CRM EJ log data extraction, modernizing legacy banking systems, and cloud deployment. Passionate about solving complex problems and delivering high-quality software.

EXPERIENCE

Networld Technology Limited

10/2022 - Present

Software Engineer

Designed and developed a microservices-based Reconciliation System using Python (Flask API) and ElectronJS.

Led full project lifecycles, deploying Laravel applications across both Windows Server (IIS) and AWS.

Walkinroom

04/2022 - 09/2022

Full Stack Developer

Developed and maintained a hotel booking platform utilizing Laravel for the backend and Tailwind CSS with JavaScript for the frontend.

PROJECTS

NetCon (ATM Data Extractor) — Python (Flask), ElectronJS (Quasar)

Developed a modular Windows application for Eastern Bank PLC using a Python (Flask) backend and ElectronJS (Quasar) frontend. Engineered interactive data visualization with multi-sorting and componentized UI for multi-vendor ATM/CRM EJ log data extraction.

Sharothee Wedding Platform — Next.js, TypeScript

Created a full-stack event management website using Next.js and TypeScript, featuring guest-facing pages, automated RSVP handling, and a full admin dashboard for content management.

Allora E-commerce REST API — Laravel Filament, Docker

Developed a scalable backend using Laravel Filament to handle core e-commerce logic (product listings, authentication, order processing) for a containerized deployment. Built a storefront utilizing Server-Side Rendering (SSR) and Incremental Static Regeneration (ISR).

NSU eKYC System — Laravel, MySQL, REST API

Built a student API-driven verification system using Laravel and MySQL with RESTful API integrations to external banks and hospitals for seamless data verification.

SKILLS

Languages & Frameworks: PHP (Laravel), Python (Flask), React (Next.js), JavaScript/TypeScript, Node.js, TailwindCSS, SQL, C

System Design: Full-stack SDLC, RESTful API design, Microservice architecture, ETL data integration

Databases: MySQL, Oracle, PostgreSQL

Cloud & DevOps: AWS (S3, RDS, ECS), Git CI/CD pipelines, Windows Server (IIS), Docker
